2. Citations and explanations (Rule 70.7)

The invention concerns a method and equipment for performing aggregate-portion-specific flow shaping in packet-switched networks, and solves the problem that no guarantee can be given in terms of throughput when multiplexing shaped traffic with unshaped traffic.

Documents cited in the International Search Report:

D2: US20030165116 A1

D3: US6532213 B1

D4: CA2366781 A1

D5: EP1111851 A2

The cited documents represent the general state of the art. The invention defined in claims 1-4 is not disclosed by any of these documents.

The cited prior art does not give any indication that would lead a person skilled in the art to the claimed method and equipment according to claims 1-4, for performing aggregate-portion-specific flow shaping in packet-switched networks in such a way as to avoid breaking the restrictions of the

Therefore, the claimed invention is not obvious to a person skilled in the art.

throughput properties of the shaping traffic being examined.

Accordingly, the invention defined in claims 1-4 is novel and is considered to involve an inventive step. The invention is industrially applicable.
